

Sheet Name: Past Major Spill Events

Description: This spreadsheet details various past major oil spill events. It includes information about the event itself, the vessels involved (if applicable), and relevant links.

Columns:

- **Spill Event:** The name or designation of the oil spill incident.
- **Date:** The date when the spill event occurred.
- **Location:** The geographical location where the spill took place.
- **Type of Oil Spilled:** The specific type of oil released during the event.
- **Approx. Volume Spilled (L):** The estimated volume of oil spilled, measured in liters.
- **Oil On Board (L):** The approximate amount of oil carried by the vessel involved at the time of the spill, in liters.
- **Approx. % Oil Spilled (L):** The estimated percentage of oil spilled relative to the total oil on board.
- **Vessel Name:** The name of the vessel involved in the spill, if applicable.
- **Vessel Type:** The category or classification of the vessel (e.g., Container Ship, Tanker, Tank Barge).
- **Vessel Length (m):** The length of the vessel in meters.
- **Capacity (L):** The total carrying capacity of the vessel in liters.
- **Gross Tonnage:** The total internal volume of the vessel.
- **Net Tonnage:** The volume of the vessel's cargo spaces.
- **Vessel Width (m):** The width of the vessel in meters.
- **Fuel Oil Capacity (L):** The capacity of the vessel's fuel oil tanks in liters.
- **Liquid Oil Capacity:** The capacity for liquid oil, likely referring to cargo oil.
- **Crude Capacity:** The capacity specifically for crude oil cargo.
- **Spill Type:** Categorization of the spill (e.g., Fuel, Cargo).
- **Oil Spill Info Links:** URLs providing more information about the oil spill incident.
- **Vessel Info Links:** URLs providing details about the vessel involved.
- **Extra Links (U, V, W):** Additional relevant URLs related to the spill or vessel.

Spreadsheet Name: Past Spill Events in the Salish

Description: This spreadsheet details various past oil spill events in the Salish Sea. It includes information about the event itself, the vessels involved (if applicable), and relevant links.

Columns:

- **Spill Event:** The name or designation of the oil spill incident.
- **Date:** The date when the spill event occurred.
- **Province/State:** The province or state where the spill took place.
- **Location:** The geographical location where the spill took place.
- **Type of Oil Spilled:** The specific type of oil released during the event.
- **Approx. Volume Spilled (L):** The estimated volume of oil spilled, measured in liters.
- **Vessel Name:** The name of the vessel involved in the spill, if applicable.
- **Vessel Type:** The category or classification of the vessel.
- **Vessel Length (m):** The length of the vessel in meters.
- **Vessel Width (m):** The width of the vessel in meters.

- **Fuel Oil Capacity (L):** The capacity of the vessel's fuel oil tanks in liters.
- **Liquid Oil Capacity:** The capacity for liquid oil, likely referring to cargo oil.
- **Crude Capacity:** The capacity specifically for crude oil cargo.
- **Spill Type:** Categorization of the spill (e.g., Fuel, Cargo).
- **** oil Spill Info Links:**** URLs providing more information about the oil spill incident.
- **Vessel Info Links:** URLs providing details about the vessel involved.
- **Notes:** Any additional notes related to the spill event.

Sheet Name: Comprehensive Event List

Description: This spreadsheet provides a comprehensive list of various events, including details about their location, date, and the amount of material spilled.

Columns:

- **Name:** The name of the event.
- **Location:** The geographical location where the event occurred.
- **Date:** The date of the event.
- **Min Tonnes Spilled:** The minimum estimated amount of material spilled in tonnes.
- **Max Tonnes Spilled:** The maximum estimated amount of material spilled in tonnes.
- **Owner:** The owner associated with the event, if applicable.
- **Link:** A link providing more information about the event.
- **Spill %:** The percentage of material spilled, if applicable.
- **Spilled (litres):** The amount of material spilled, measured in litres, if applicable.
- **On board (litres):** The amount of material on board, measured in litres, if applicable.
